

# Intelligent Automation

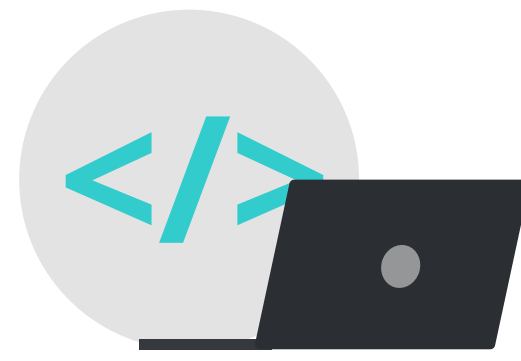

Hyperautomation drives the expansion of automation within smart companies that are willing to do things differently. Extending through a range of tools that can automate, but also become more sophisticated, allow discovering, analyzing, designing, measuring, monitoring and re-evaluating processes, with the aim of improving productivity and efficiency in strategic decision-making throughout the company and in turn improve the customer experience in the delivery of services.

Its objective is the proper orchestration between humans and bots, it allows companies to obtain a holistic view of end-to-end business processes to increase productivity in organizations and to focus humans on a more value-oriented work.

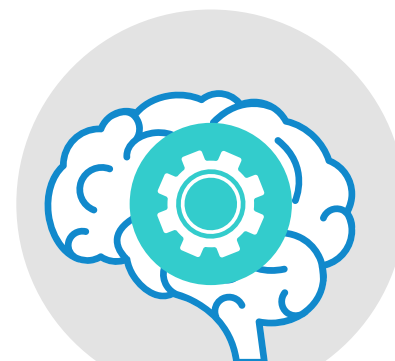

## The Smart Hyperautomation equation

$$\text{RPA} + \text{IA} + \text{IBPM} + \text{MBGE} = \text{HI}$$

### Robotic Process Automation

Development and management software for 'robots' that function as application users, automating structured and repeatable tasks, with the aim of guaranteeing administrative or operational demand, providing immediate benefits, ensuring an ROI in weeks and allowing humans, be human.

### Artificial intelligence

It uses artificial intelligence to reveal processes and systems with capacities to learn and reason as a human would, based on patterns according to previous experience.

### Digital Process Automation

Digital transformation platform focused on low code development, which supports the entire life cycle of business processes and decisions: discovery, analysis, design, implementation, execution, monitoring and continuous optimization.

### MBGE

We combine the experience of more than 20 years in the market with an agile and disruptive operating model, led by highly trained professionals and organizational values that, when added together, generate value for each of our clients.

You can understand how well you are doing and improve the performance of your organization.

Free of errors thanks to the precision in the processing of the information and under the best practices.

High speed in data processing.

Measurable, scalable and elastic services, which allow a fast and transparent ROI.

Alliances that transform your world, achieve the Intelligent Hyperautomation of your processes from start to finish and meet your corporate objectives.

Choose the path, we will accompany you in the process.

More than 500 clients and the best technological allies specialists in their field support us
